X TREME GC

Solid Grease Trap Maintenance

Continual Grease Degradation

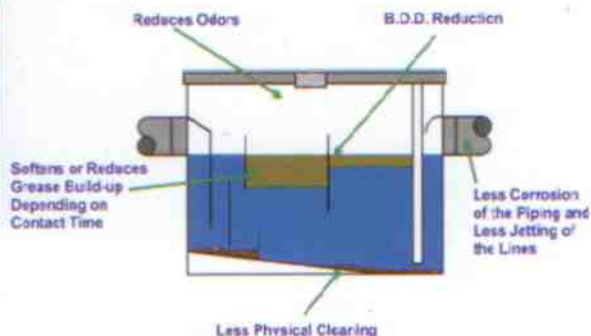

Improved biological product specifically formulated and packaged for use in restaurants where the water temperatures are higher.

Xtreme GC minimizes hydrogen sulfides and build up of sludge, thereby reducing odors, fecal matters, and grease compounds.

This formulation resists higher temperature water to dissolve gradually over 30 to 45 days (dependent upon flow rate) allowing for continuous waste treatment with minimal application effort.

To assure optimal performance of these organisms, under the toughest conditions, they are produced and blended together with "high potency" nutrients and stimulants.

Typical packaging for this product is 8 x 8 oz. blocks per box.

One 8 oz Xtreme GC will treat up to 50 gallon capacity.
